

#2150  
1777 USF  
2052 RSF

This is a detailed floor plan of room #2150. The plan shows a large open area with a smaller, more complex section on the left side. The top edge of the room features a series of small rectangular protrusions, likely for ceiling panels. The left wall has several door openings. The right wall is lined with a series of small rectangular protrusions, possibly for wall-mounted equipment or panels. The floor is marked with various symbols: circles with a crosshair, triangles, and squares, which represent electrical and mechanical components. A central area contains a large, complex structure that could be a piece of equipment or a large desk. The overall layout is rectangular with a smaller section on the left side.
